

RavenStack Churn Analysis - Task 2 Submission

1. Baseline Stats

- Total Accounts: 500
- Total Churned: 110
- Overall Company Churn Rate: 22.00%

2. Churn by Industry

- DevTools: 30.97% (35 churned out of 113 total)
- FinTech: 22.32% (25 churned out of 112 total)
- HealthTech: 21.88% (21 churned out of 96 total)
- EdTech: 16.46% (13 churned out of 79 total)
- Cybersecurity: 16.00% (16 churned out of 100 total)

3. Top Reason Codes for Churn

- FEATURES: 114 accounts (19.0%)
- SUPPORT: 104 accounts (17.3%)
- BUDGET: 104 accounts (17.3%)
- UNKNOWN: 95 accounts (15.8%)
- COMPETITOR: 92 accounts (15.3%)
- PRICING: 91 accounts (15.2%)

4. Support Metrics Breakdown

Active Accounts (churn_flag = False):

- Average Resolution Time: 35.92 hours
- Average Satisfaction Score: 3.97 / 5
- Average First Response Time: 89.50 minutes
- Escalation Rate: 4.53%

Churned Accounts (churn_flag = True):

- Average Resolution Time: 35.66 hours
- Average Satisfaction Score: 4.01 / 5
- Average First Response Time: 84.78 minutes
- Escalation Rate: 5.56%

5. summary

Though a day-to-day customer support response time and also the general satisfaction are moderate across all accounts, a churned account shows a noticeably higher ticket escalation rate (5.56% vs 4.53%). This shows a potential friction point in handling complex technical tier-2 issues. Additionally, DevTools accounts are leaving the platform at the highest rate (30.97%), primarily driven by gaps in product features.
